

JUICE

PORTABLE GENERATOR
by enertec

Portable Variable Speed Inverter Generator

Whether its aboard your boat, motorhome or camping, Juice portable variable speed inverter generators provide the power to run your AC appliances like microwaves, hair dryers, power tools, entertainment equipment, refrigerators and battery chargers when you require independence from the grid.

Compact, lightweight and quiet, Juice generators use variable speed inverter technology to provide reliable, stable and clean power to run even the most sensitive equipment. This technology also allows the generator to continually vary its speed (rpm) based on the connected load to operate more efficiently while emitting even less noise.

Benefits:

- High output of 2400 Watts max, 2100 Watts continuous
- Compact and lightweight design
- 15% lower fuel consumption due to variable speed technology
- Large 5 litre fuel tank for longer running hours than the competition
- Low noise. 52 – 59dba (7m). Less noise than normal conversation
- Operates in up to 50°C ambient temperatures
- Additional 12V DC outlet and USB charging outlet
- Stable AC output to run even the most sensitive of AC equipment
- Patented inner structure of dual-fan, dual-air channel, dual-muffler and double layer acoustic hood to ensure better cooling and lower noise.

SPECIFICATIONS

Model	LH2500i
Generator Technology	Variable speed Inverter Technology
Engine Model	LH148F
Fuel	Petrol
Engine Type	Air-cooled, four-stroke
Starting system	Recoil starter
Bore X Stroke	48.6 x 43
Displacement	79ccm
Fuel Capacity	5 litres
Continuous running time	5-20hrs
Noise Level @ 7m	52-59db
Rated AC Frequency	50Hz
Rated AC Voltage	230V
Rated AC Current	9.1A
Max Output	2.4kW
Continuous Output	2.1kW
Rated DC Voltage	12V
Rated DC Current	8A
Rated DC Output	96W
THD	<2.5%
Low Oil Alarm	YES
Overload Alarm	YES
Output Indicator	YES
Auto Adjust Device	YES
Smart Throttle	YES
Choke	YES
Reset Function	YES
DC socket	YES
USB socket	YES
Dimensions	512 x 315 x 447h mm
Net Weight	19.5kg
Gross Weight	22.5kg
